

Name _____

Mohawk Valley Community College

CI 132 Lab 29

Change to the directory `/opt/ci132/data/lab29` and provide command strings to answer the following questions. This directory contains fictitious submitted labs. Commands listed in the responses below will be used for creating future shell scripts.

1. List all PDF documents in the directory
2. List all unique usernames associated with PDF document submissions. Your output should contain only usernames.
3. Modify the above command string to demonstrate how you would save the output to a variable
4. Display the value of the variable used in question 3
5. Pick a username from the above list. List all labs submitted by that user. Your list should resemble the following output:
lab1
lab3
lab10
lab12
