## Mohawk Valley Community College

### CI 132 Lab 8

1. Provide the full path to your home directory on the class shell server
  
2. Provide the full path to your instructor's home directory on the class shell server
  
3. Provide the full path to the home directory belonging to the user named **ci132** on the class shell server
  
4. Explain how you found the answer to the previous question
  
5. List the contents of the directory named **lab8** located in the **ci132** user's home directory using a single command in the most efficient way possible. Your command must work from any location on the system. Provide the directory listing and the command string used to obtain it.
  
6. List three dissimilar ways to use the **cd** command to return to your home directory.
